

Compassionate, Coordinated, and Customizable Transport Services

At Phoenix Paramedic Solutions, our non-emergency medical transport services are more than just rides—they're critical links in a continuum of care built on compassion, safety, and innovation.

We proudly serve Lafayette, Tippecanoe County, and surrounding communities with **Advanced Life Support (ALS)** and **Basic Life Support (BLS)** transport, as well as **inter-facility transfers**. Whether it's getting a patient to dialysis, a rehab facility, or a follow-up appointment, we deliver seamless, supportive transport tailored to every individual's clinical needs.

What sets us apart is how we *integrate transport within a larger healthcare vision*. Our team isn't just getting patients from point A to point B—we're working within a broader system that includes community paramedicine, mental health support, occupational health services, and crisis recovery. This coordination ensures every handoff is smooth, every detail is managed, and every person feels cared for.

Our difference is in the details:

- **Professionally trained EMTs and paramedics** with a commitment to patient safety
- **Innovative partnerships** with Purdue University and regional healthcare systems
- **Real-time communication and transparency** with patients, families, and facilities
- **Personalized attention** with a culture rooted in advocacy, courtesy, and efficiency

Safety-first approach, reinforced by our Four Feathers customer experience model

When trust matters most, Phoenix Paramedic Solutions is ready—compassionate in our care, precise in our execution, and always striving to go above and beyond.
